(54) Title: AUCTION WITH INTEREST RATE BIDDING

(57) Abstract: A method, apparatus, and system are provided for declining auction with interest rate bidding. According to one embodiment, an interest rate may be set for a transacted financial instrument, and information regarding the financial instrument and an interest rate at which the financial instrument is offered are published via a computer network. Offers from respective bidders to transact the financial instrument may be received, via the computer network, being expressed as offered interest rates at which the bidders are willing to transact the financial instrument. On the termination of a bid receiving process, whether at least one of the offers satisfies transaction criteria, as defined by a seller of the financial instrument, may be determined. If it is determined that at least one of the offers satisfies the transaction criteria, then at least one of the offers may be identified as an accepted offer.
